PROFILE

I am an undergraduate in Information Systems who is highly organized with a strong passion for front-end development. I actively work on various projects, both in organizational settings and personal initiatives, and conduct research at my campus to continuously develop my knowledge and skills. As a front-end developer, I love tinkering with code and giving websites that extra "magic touch" to make them visually appealing, while also focusing on delivering a great user experience. I am a disciplined, active, and responsible worker, with a passion for carrying out organizational activities and social work to further improve myself and strive to become the best version of me.
